Introduction

The Public Prosecution Service

The Public Prosecution Service for Northern Ireland (PPS), which is headed by the Director of Public Prosecutions, is the principal prosecuting authority in Northern Ireland. In addition to taking decisions as to prosecution in cases investigated by the police, it also considers cases investigated by other statutory authorities, such as HM Revenue and Customs.

The primary role of the PPS is to reach decisions to prosecute or not to prosecute and to have responsibility for the conduct of criminal proceedings. A range of options is also available for dealing with offenders other than through prosecution. These options include cautions, informed warnings, and youth conferencing. Prosecutors may also refer offenders to the National Driver Alertness Scheme or to a Community Restorative Justice Scheme.

For further information on the role and structure of the PPS please visit www.ppsni.gov.uk.

The PPS would value any feedback on this report and welcome recommendations on the future addition of data that may be of interest to readers. Contact details are provided at the end of this document.

About this Bulletin

This bulletin presents key statistics on the activity of the PPS, including caseloads and prosecutorial decisions. It also includes data on the outcomes of prosecutions at court. The report provides information for the 2023/24 financial year (i.e., 1 April 2023 to 31 March 2024) and includes comparisons for 2022/23. Where appropriate detailed notes have been provided, which give an explanation of the relevant PPS processes and procedures. Please see Glossary, User Notes and tables for further information.

Statistics for the financial year have been finalised.

Official Statistics

These are 'Official Statistics' as defined in Section 6 of the Statistics and Registration Services Act 2007. Statisticians from the Northern Ireland Statistics and Research Agency are seconded to the PPS and are responsible for ensuring that the statistics produced comply with the Code of Practice for Official Statistics.

Our statistical practice is regulated by the [Office for Statistics Regulation](#) (OSR). User notes

Data sources and validations

The information presented in this bulletin is derived from the Case Management System (CMS), the main operational system in use within the PPS. This is a 'live' system with data being input on a daily basis.

It should be noted that the CMS is also linked to the CJSNI's Causeway data sharing mechanism. The first phase of Causeway ('DSM 0'), introduced in 2005/06, allowed police to submit files to the PPS electronically. The most recent phase ('DSM 1') was launched at the end of November 2009 and broadened the portfolio of information shared electronically. For example, PPS are now supplied with court results by the Northern Ireland Courts and Tribunals Service which feed into the PPS Case Management System via Causeway.

The information is extracted using Business Objects. It is then validated, and quality assured to ensure that the data is reliable and robust for use. Any inconsistencies are reported back to operational staff or to the PPS Information and Communications Technology Branch. If required, any necessary amendments are then made to the data.

Rounding conventions

Percentages have been rounded to one whole number and may not always sum to 100%. Where a base number is less than 50, percentages are not provided.

Disclosure control

Where small numbers (less than 3) within the tables have the potential to disclose sensitive information, disclosure controls have been applied and numbers less than three have been suppressed (see notes to individual tables).

Future publications

The quarterly release of the Statistical Bulletin was suspended in November 2019. Since then, it has been released on an annual basis. A user engagement exercise in March 2022 regarding PPS Official Statistics has indicated minimal impact of this change in frequency on users. The Statistical Bulletin will therefore continue to be published on an annual basis. The next Annual Statistical Bulletin for 2024/25 is due in Summer 2025.

Previous changes

Since June 2023, an additional table 3d 'Decisions Issued to Prosecute or Divert by Offence Classification' has been included in the Excel tables. This decision was based on feedback.

In June 2022, this publication was revised with the data tables removed from the statistical report to improve user functionality. Tables can be found in the accompanying Excel document. Clarity has been increased by introducing additional charts and graphs, compliant with accessibility guidelines, and by displaying selected figures over a 5-year trend. Additional breakdowns of age and gender have also been provided within the data tables and the release. This decision was based on user feedback.

Glossary

Caution: A *caution* is a formal reprimand administered by the police. Whilst it is not a conviction it is recorded on a person's criminal record.

Conviction rates: Conviction rates are calculated on the basis of the number of persons convicted as a percentage of all persons dealt with during the period.

Crown Court outcomes: The category '*acquitted*' includes the following outcomes: acquittals, acquittals by direction, No Bills, no evidence offered – defendant acquitted, left on books, proceedings stayed, unfit to plead – but found that he/she did not do the act, no case to answer - granted. '*Other*' Includes defendant deceased, withdrawal – all charges, bound over for not having shown cause, bound over where charge withdrawn, withdrawn due to diversionary route. It should be noted that if an individual is involved in more than one case which is resulted during this period, they will be counted as a separate defendant on each occasion.

Decision information request (DIR): A *decision information request (DIR)* is issued by PPS to police where the evidence and information contained in an investigation file is incomplete and a further written report or action is required before a prosecutorial decision can be taken.

Diversionary options: Diversionary options are only available to prosecutors if the defendant admits that he/she has committed the offence and agrees to accept and participate in the diversionary option. '*Other diversionary options* include referrals to the NI Driver Improvement Scheme or to a Community Restorative Justice Scheme.

Diversionary youth conference: A *diversionary youth conference* is an alternative to prosecution in court and may be used in cases where the defendant is a youth. This type of restorative conference may involve a number of parties, including the defendant, the victim and police. A youth conference is a formal process, and although not a conviction, is recorded on a person's criminal record.

Eightieth percentile: *Eightieth percentile* is the number of days at which 80% of those persons included under counting rules have had a first decision issued. Eightieth percentile days for indictable prosecution decisions includes the time taken for the prosecutor's decision and for case preparation (i.e., where appropriate, ensuring that the case is ready for court) and include time taken for response from police to any decision information requests. In indictable cases case preparation includes time required for the preparation of committal papers which contain the evidence, such as statements, exhibits etc., to be presented to the Crown Court. It may also include consideration of duties of disclosure by the prosecutor and applications to be made to the court.

File: A file may refer to one or more individuals

File Type: *File type* is based on the 'primary' offence in each case at the time the file is submitted to PPS.

Note: Under the agreed operating model, police must submit all files to the PPS where an offence is suspected to have taken place, where there is an identifiable suspect and where there is any evidence, however weak, to link the suspect to the crime. This includes files where there is a police recommendation for 'no prosecution'. Commencing 29 November 2023, a revised model is being piloted across Northern Ireland whereby the Police Service of Northern Ireland (PSNI) are longer required to submit all files where a no prosecution recommendation is made for each of the suspects in the case. The PSNI are now authorised to take a 'No File Decision' (NFD) in cases involving certain offences, and where appropriate to take no further action. The offences covered by the pilot are those generally directed upon by a Public Prosecutor, ranging from assault (Assault occasioning actual bodily harm and below) to minor motoring offences. The PPS continue to take all decisions in the more serious files where police have recommended no prosecution, and which are generally directed upon by Senior Public Prosecutors.

Full file requests: *Full file requests* are designed to allow the PPS to ask the PSNI for a full file as defined in the relevant protocols.

Hybrid offence: *Hybrid offences* which may be tried at either the Magistrates' or Crown Court.

Indictable offence: *Indictable offences* relate to more serious criminal behaviour and are tried at the Crown Court before a judge, and in most cases, a jury.

Indictable prosecution: *Indictable prosecution* applies in the more serious offences which may be heard in the Crown Court.

Informed warning: *An informed warning* is a formal reprimand administered by police and is recorded on a person's criminal record.

Magistrates' and Youth Court outcomes: Data reflect the number of persons where PPS has taken a decision to prosecute summarily, i.e., defendants against whom charges were withdrawn prior to decision are excluded. The category '*acquitted*' includes the following outcomes: dismissed; no case to answer granted; and proceedings stayed. '*Other*' includes: defendant deceased; withdrawal – all charges; bound over for not having shown cause; bound over where charge withdrawn; withdrawn due to diversionary route. Excludes persons returned for trial in the Crown Court. It should be noted that if an individual is involved in more

than one case which is resulted during this period, they will be counted as a separate defendant on each occasion.

Median days: *Median days* is the number of days at which 50% of those persons included under counting rules have had a first decision issued. Median days for indictable prosecution decisions includes the time taken for the prosecutor's decision and for case preparation (i.e., where appropriate, ensuring that the case is ready for court) and include time taken for response from police to any decision information requests. In indictable cases case preparation includes time required for the preparation of committal papers which contain the evidence, such as statements, exhibits etc., to be presented to the Crown Court. It may also include consideration of duties of disclosure by the prosecutor and applications to be made to the court.

No Decision DIR: *A no decision DIR* may issue when, on the evidence submitted by police in an investigation file, it is not possible to take a prosecution decision and it is not reasonable to issue a detailed DIR having regard to the number or type of deficiencies in the file.

No prosecution: *A decision for no prosecution* will be taken if the prosecutor decides that in any case being considered there is insufficient evidence or that it is not in the public interest to prosecute (see note regarding the Test for Prosecution below).

Offence classifications: The Offence Classifications used are standardised across the criminal justice organisations in Northern Ireland. Files have been assigned to the respective categories on the basis of the 'primary' offence.

Police: includes the Police Service of Northern Ireland, Belfast/Londonderry Harbour Police, and British Transport Police.

Post decision information request: *Post decision information requests* are designed to allow the PPS to ask the PSNI to gather additional evidential material or provide other information required at some further stage in the prosecution process (e.g., for trial).

Primary offence: Generally, the most serious offence in terms of the potential penalties in law.

Prosecutorial decision: More than one prosecutorial decision may be recorded against any individual within a case. Therefore 'type of decision' refers to the most serious decision issued, in the following order: Indictable prosecution; summary prosecution; diversion; and no prosecution.

Summary offence: In general, *summary offences* relate to less serious criminal behaviour and are tried in the Magistrates' Court before a District Judge

Summary prosecution: *Summary prosecution* applies to cases which may be heard in the Magistrates' Courts.

Summons: A summons may be served on a defendant either by post, or via a personal summons served by the police. The defendant will be required to attend court on the date stated on the summons. The large majority of offences can now be dealt with by way of a postal summons. The only exceptions relate to corporate defendants, vulnerable defendants and those defendants who have not responded to a postal summons.

More than one summons may be issued in respect of an individual defendant in a case. For example, if the defendant does not attend court on the day stated on an initial postal summons, this will generally be followed up by a personal summons served by police.

Test for Prosecution: Prosecutions are initiated where the prosecutor is satisfied that the Test for Prosecution is met. There are two aspects to the Test:

- a) Whether the evidence which can be offered in court is sufficient to provide a reasonable prospect of conviction (the evidential test); and
- b) Whether prosecution is required in the public interest (the public interest test).

Each of these stages must be separately considered but a decision whether or not a prosecution is in the public interest can only arise when the evidential test has been satisfied.
